

In The Claims

Please amend claim 1 to read as follows:

1. (Amended) In a utility vehicle having a chassis supported on wheels, and an operator's cab supported by a metal cab frame, the improvement comprising:
 - an integral floor and fender structure formed by a contoured body substantially composed of plastic material; and
 - said metal cab frame supported on a top side of said contoured body,
 - said metal cab frame supported on said plastic material of said contoured body.

Please amend claim 12 to read as follows:

12. (Amended) The improvement according to claim 1, wherein said contoured body is composed of a substantially homogeneous fiber-reinforced plastic.

Please amend claim 19 to read as follows:

19. (Amended) In a utility vehicle having a chassis supported on wheels, and an operator's cab supported by a metal cab frame, the improvement comprising:
 - an integral floor and fender structure formed by a contoured body substantially composed of plastic material;
 - said metal cab frame supported on a top side of said contoured body;

and

wherein said operator's cab comprises a roof and said metal cab frame comprises front and rear columns supporting said roof, and side members connecting said front columns to said rear columns, said side members being secured to a top side of said integral floor and fender structure.
